

Homeschool Testing

At the University of Minnesota

About Us

The Minnesota Statewide Testing Program (MSTP) provides testing services for homeschool educators in Minnesota.

Homeschools are required to annually administer a nationally normed achievement test for each student age 7-17.

MSTP offers two options that meet this requirement. The table on the right compares these two options.

Also available: a career interest inventory (IDEAS) and a learning ability/learning style test (CogAT).
